

The Convenient Solution

The HiFlow In-Line Filter System is easily installed using common household tools. This system mounts under your sink and is plumbed inline to any mixer or standard cold water tap. Cartridge replacement is as easy as changing a light bulb.

The Practical Solution

At around one cent per litre, this system is less expensive per glass than bottled water or other drinking water systems and provides approximately a year's supply of water, depending on incoming water quality, usage and pressure.

The Healthy Solution

Not only does HiFlow remove Bad Taste and Odour but it is certified to remove/reduce contaminants including: Lead, Cysts, Giardia, Cryptosporidium and Chlorine. The filter system inhibits limescale buildup in water using appliances but does not remove fluoride and healthy natural minerals and salts.

HiFlow Filters *there's Simply no Separate Tap!*

Water Filters Australia Pty Limited is a 100% Australian owned company that has been operating nationally since 1999. Water Filters Australia services a wide range of filtration applications, with a specialization in half micron under sink filtration through their exclusive Everpure distribution licence. Everpure Inc was established in 1933 and is now at the forefront of new filter technologies and it is through these innovations that HiFlow becomes available to the Australian market.

THERE'S SIMPLY NO SEPARATE TAP

Better, healthier living from a constant source of clear, safe, freshly filtered drinking water

Now you really can simply bottle your own clear freshly filtered water straight from your mains cold tap.

Enjoy freshly filtered water, not only for drinking, (coffee, tea and iced drinks), but in washing fruit and vegetables and all cooking and food preparation including baby formulas.

THE OLD TECHNOLOGY

- Separate Tap required
- Complex Installation.
- Vertical Installation only.
- Various Micron Ratings.
- Standard Sink Suitable Only.
- Limited Volume.
- Slow Flow Rate.
- 6-12 months Cartridge Life.
- Warranties vary.

Compare now with HiFLOW-THE NEW TECHNOLOGY

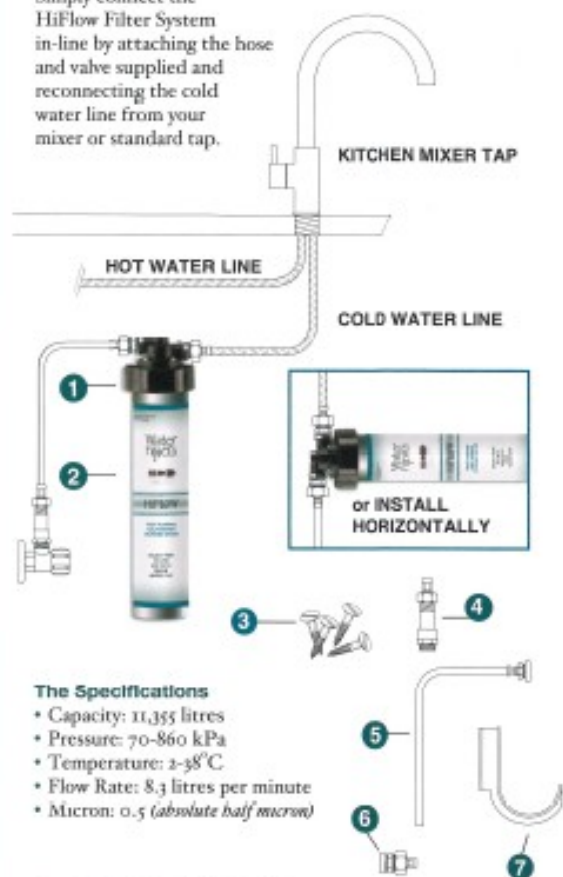

- ◆ No Separate Tap, plumb it directly into your cold mains water tap.
- ◆ Easy installation.
- ◆ Vertical or horizontal installation offering total flexibility.
- ◆ Half Micron Filtration (Absolute).
- ◆ Perfect also for Granite or Stone Benchtops along with Under Slung sinks.
- ◆ Over 11,000 litres
- ◆ Fast Flowing, 8.3 ltrs per minute, that of your current mains water pressure.
- ◆ 12 months Cartridge Life.
- ◆ 5 year Warranty.

HALF MICRON
FRESHLY FILTERED
WATER FROM
YOUR MAINS
for MIXER or
STANDARD
COLD WATER TAPS

With mains water off, disconnect cold water line to mixer or standard cold water tap. Simply connect the HiFlow Filter System in-line by attaching the hose and valve supplied and reconnecting the cold water line from your mixer or standard tap.

HiFLOW

The Specifications

- Capacity: 11,355 litres
- Pressure: 70-860 kPa
- Temperature: 2-38°C
- Flow Rate: 8.3 litres per minute
- Micron: 0.5 (absolute half micron)

The HiFLOW Installation Kit

1. WFA QL-2 Filter Head Assembly.
2. WFA Hi-Flow Filter Cartridge.
3. Mounting Screws.
4. Dual Check Valve.
5. Pex Hose 550mm
6. Brass Nipple 3/8" to 1/2"
7. Horizontal Stabilising Bracket.
8. Filter Monitor Alarm.
9. Plumbing Tape
