Article No.:	8013629
Series:	Backcountry

FACT SHEET

FACTS

- Best selling microfilter in the US Outdoor Market
- Chosen "the unrivaled best for field use" by US Backpacker Magazine
- Chosen easiest to use by 4 out of 5 US retail experts
- Large filter surface of 271 cm² (107 square inches) makes pumping easy
- Approximately 48 strokes per minute to provide 1 litre of water
- Connects to most popular water bottles
- The lowest priced water filter pump in its class
- For clear and occasionally turbid water
- For longer trips, say several months, we would recommend ceramic filters like the Pocket or Combi

PRODUCT CHARACTERISTICS > BENEFITS

- AntiClog™ pleated cartridge > long lasting with no maintenance or cleaning required
- Very large filter surface > fast output and ease of use because of minimal resistance whilst pumping
- Active carbon core > reduces unpleasant tastes and odours from the water
- Small pre-filter on in-hose > protects filter cartridge life in turbid water
- Compact design and easy operation > to fit in any backpack or travel bag
- Easy Fill™ Bottle Adaptor > attaches directly to a drinking bottle

SHORT PROFILE

Very convenient filter. Fast and easy to use pumping mechanism. For 1 to 2 persons. Ideal for back-packing and trekking.
