

Water2water Aquanet System

The Aquanet filter adds a refreshing new dimension to bottled water centres. It offers advanced design and user-friendly features resulting in great tasting, healthy drinking water.

Features

- Lateral flow distribution to prevent channelling.
- Filter base perforations for saturated water distribution.
- Internal Guide rails centrally locate and align bottle neck.
- Reusable non-spill cap automatically releases water when needed to
- prevent spills and mess.

Function

The Aquanet function through a combination of adsorption, absorption, ion exchange and mechanical filtration. Aquanet filters the water as it leaves the bottle and reduces water borne contaminants before it reach the reservoir.

The four stage filter media substantially reduces chlorine, bad taste, odour and colour, along with organic impurities, pesticides, herbicides, detergent, dirt, rust and heavy metals such as lead, mercury and aluminium.

Installation

Aquanet installs in seconds. It fits perfectly into the cooler or crock. There are no bolts or screws and no tools required.

Freestanding Cooler**

Benefits

- Water on tap and filtered at the point of use
- Great tasting, healthy drinking water
- Guaranteed Quality of water
- No plumbing required

Technical Data

Stage 1

5 micron needle felt membrane pre-filter.

Stage 2*

5 micron weak acid cation resin for reducing hardness, heavy metal and chlorine.

Stage 3**

High grade activated carbon for reducing chlorine, compounds, taste, rust and odour.

Stage 4

5 micron needle felt membrane final filter.

*Weak acid cation resin is designed to reduce alkalinity and hardness in water. It is also excellent for the reduction of heavy metals and chlorine.

**EPA approved silver carbon is design for reducing organic chemicals such as TCE, THM and EDB, plus reducing chlorine. The addition of silver inhibits the growth of bacteria.

Non-Spill Cap

Aquanet Filter

Installation

Options

Bottle: 15L P.E.T. bottle

Non-spill cap: Allows the bottle to be changed without spillage. The valve automatically opens and closes to release the water only when required. It fits most 8, 11 , 15 and 19 litre bottles.

Coolers: Water2water bottle coolers are available as a freestanding or bench top unit with either hot/cold or cool/cold taps.

Cup Holders: Cup holders are an optional extra.

Child Proof Taps: Child proof taps are an optional extra.

Please advise your Water2water representative if you wish to know more about these options.
