

Water2water Mixer Tap Filtration System

The Mixer Tap Filtration System is a compact under sink system that is easy to install, connecting directly to any mixer tap or cold water tap. This allows you to enjoy your own great tasting, clear, freshly filtered water any time; with no need for a separate tap.

The system offers the following:

- Reduces sediment, taste, odour, chlorine, parasitic cysts
- Easy-to-change sanitary filter cartridge
- Filters available in 5 micron or 0.5 sub micron rating
- All plumbing fittings included. Customer supplies cold water tap
- System certified to Australian Standards
- System designed and assembled in Australia -Filter cartridge manufactured in USA

Enjoy great
tasting clean
water from your
existing tap
