

IC8 Undersink Cool/Cold System

The Waterworks IC8 compact, remote chiller is designed for use with drinking fountains, filters, bubblers or glass fillers, thereby enabling any drinking station to supply chilled refreshing water. It can be installed under a sink or bench, in the ceiling, on a column, an adjacent wall, or in a service area. In fact it's perfect for virtually any single remote outlet at home or in the office and with the addition of optional filtration, it delivers fresh, clean, chilled water at the touch of a button.

Eliminate the need for expensive unsightly bottled water units and associated inconvenience. Install an IC8 under sink chiller and enjoy continuous supply of chilled water.

- ◆ **Tank** Constructed of stainless steel, it has a volume of 1.9 Litres, is fully insulated and independently tested to withstand over 800psi of static pressure. A drain plug and seal is provided, which is removable for servicing. The internal waterlines are 1/4"OD stainless steel and are heliarc welded to eliminate corrosion.
- ◆ **Temperature Control** The entire system is controlled by an adjustable, (factory pre-set), thermostat for balanced and efficient cooling.
- ◆ **Condenser** This fan assisted, static condenser system utilises R134a refrigerant which is non toxic, non-flammable and non ozone depleting.
- ◆ **Compressor** The compressor is protected by an automatic overload, is lifetime lubricated and hermetically sealed.
- ◆ **Water Connections** Both the inlet and outlet are recessed, 1/4" stainless steel pipes, suitable for connection to industry standard 1/4" quick connect fittings.
- ◆ **Refrigerant** Non toxic, non flammable R134a refrigerant gas charge.
- ◆ **Case** The IC8 cabinet is constructed of "Galvalume," a material with the ideal blend of Aluminium Zinc and Silicone which provides the IC8 with superior heat and corrosion resistance.
- ◆ **Cooling Performance** The Waterworks IC8 is capable of cooling approximately 6*LPH (litres per hour) at 10°C.
