

Whole of House Dual Filtration System

The whole family can enjoy the healthy benefits of pure, clean water from every single tap!

385w x 220d x 720h
1" ports

Stop worrying about your home water supply

- ◆ No more chemicals in your water!
- ◆ 5 micron nominal filtration.
- ◆ Matrikx + CTO/2 Filters - most widely used in the world.
- ◆ Simultaneously removes chlorine, taste and odour and organic chemicals that contribute to bad taste and odour.
- ◆ Capacity approximately 150,000L depending on quality of source water and volume of use.
- ◆ No release of carbon fines.
- ◆ Manufactured using FDA-compliant materials.
- ◆ High flow filtration - 75LPM flow rate

Our Whole house twin filtration system is designed to filter your whole house; meaning that all taps throughout will produce filtered water. This system uses a 1 micron sediment filter and a 5 micron carbon filter.

Sediment filters are effective in removing silt, rust, sand, algae, sediment, scale particles, dirt and cloudiness from the water

The Matrikx + CTO/2 carbon filter removes chlorine taste and odour and organic chemicals that contribute to taste and odour, while also providing the particulate filtration and dirt-holding capacity.
