

Counter Top Filtration

AquaPro Counter Top System

AquaPro

◆ Features:

- ◆ Fits on single handle or double handle faucet.
- ◆ Fits on a non threaded faucet.

◆ Functions:

- ◆ Removes chlorine, volatile organic compounds (VOCs), chlorinated hydrocarbons, particulates and dissolves organic impurities from the water, aqueous solutions or suspensions and many organic solvents.

◆ Maintenance:

- ◆ Replace the filter cartridge at least every 6 months.
- ◆ Replace tubing once a year.

- ◆ The AquaPro uses a carbon filter or a copper reduction filter. These filters remove unpleasant taste and odour as well as filtering the out chemicals. Additionally, the copper reduction (CC1) filter is highly effective in removing copper, mercury, lead and Zinc.
