

W2W BIBO Boil & Chill Dispenser

Unlimited chilled and boiling filtered water at the touch of a button!

With its sleek, modern design, digital touch screen and range of colours, the BIBO Boil & Chill Dispenser is a great-looking and effective addition to any kitchen or office.

Includes Filter and UV lamp.

Water2water BIBO Boil & Chill Water Dispenser

An innovation in chilled and hot water dispensers, with in-built carbon and UV filtration for pure, delicious drinking water at the touch of a button.

- › Mains fed, plumbed in water dispenser delivering fresh filtered hot and cold water 24/7
- › Touch screen and choice of colours to fit any office or kitchen decor
- › Sophisticated multi-stage carbon filtration and UV lamp purification to remove bacteria and contaminants
- › Instant boiling water at the touch of a button – say goodbye to your energy-guzzling kettle
- › On-screen reminder when it's time to change the filter
- › Money saving – provides 60 to 70 cups of hot water every hour – no loss of productivity waiting for the kettle to boil
- › Available to rent (WA only) and buy
- › Perfect for the home and small offices to provide your guests and visitors with fresh, great-tasting hot and cold drinks, night and day
- › We recommend combining your BIBO with a Water2water filtration system for added water purity and to protect the lifespan of your BIBO dispenser in areas with poor quality source water.

Is a W2W BIBO Boil & Chill Dispenser right for you?

The W2W BIBO hot and cold water dispenser needs to be connected to the mains water supply and plugged into an electrical point.

We recommend changing the filters and servicing your BIBO dispenser every 6 to 12 months depending on usage and the quality of your source water. This will protect internal components, maintain performance and guarantee water taste and quality.

A more cost-effective way to provide unlimited filtered boiling and chilled water than boiling kettles and buying bottled water.

The W2W BIBO system is a great-looking compact water dispenser and is ideal for offices and small to medium workplaces.

Clients in most areas of Western Australia can rent a W2W BIBO Boil & Chill water dispenser and regular servicing, filter replacement and maintenance is included with many rental plans.

Contact us on **1300 880 303** for free unbiased advice on the best filtered drinking water dispensers for large workplaces.

Replacing W2W BIBO Filters and UV Lamps

The W2W BIBO Boil & Chill Water Dispenser includes a multi-stage carbon filter and UV lamp to remove nasty chemicals and contaminants, whilst retaining good essential minerals.

To protect water quality and maintain optimum performance, we recommend replacing your filter and UV lamp every 6 to 12 months depending on usage and the quality of your source water.

The BIBO water dispenser's digital menu display will let you know when it's time to replace your filters.
