

W2W All-In-One Boil and Chill Tap

Swap the kettle and plastic water bottles for this convenient, under-sink chilled and boiling water filter tap.

Ideal for homes and offices, the W2W All-In-One Tap provides an unlimited supply of fresh, filtered boiling or chilled water.

Water2water All-In-One Boil and Chill Tap

Stay hydrated and healthy with this Australian-made, cost-effective and energy-saving mains-fed chilled and boiling water sink-top tap.

- › Models include **Chilled & Boiling**, **Chilled** or **Boiling** options
- › Robust and compact chiller and boiler units sit under the sink connected to the mains water supply
- › Up to 120 cups of boiling water and 125 glasses of chilled water every hour
- › Includes 5-micron filter which reduces chlorine and removes dirt and odours
- › Touchpad operation and programmable safety lock
- › Easy to combine with mains-fed filtration systems including Reverse Osmosis to remove calcium, chlorine and unwanted chemicals and contaminants
- › Improve office productivity – no waiting for the kettle
- › Solid brass tap with modern chrome finish
- › Environmentally friendly – no need for plastic water bottles
- › Energy-efficient automatic “sleep mode”
- › Available to rent (WA only), and buy

How does a W2W All-In-One Boil and Chill Tap work?

The W2W All-In-One Boil and Chill Tap is fed by compact boiler and chiller units (depending on the model), which must be plumbed into the mains water supply.

The boiling and/or chiller units sit under the sink and feed water to the tap, which has an electronic touchpad, and the system needs to be connected to an electricity supply.

Filters in the W2W All-In-One Boil and Chill Tap should be replaced every six to 12 months, depending on how much water you use and the quality of source water.

Alternatively, you can combine the W2W All-In-One Boil and Chill Tap with a mains-fed twin or reverse osmosis filter system to guarantee water quality and protect the internal components of your tap system.

We stock and ship most W2W All-In-One Boil and Chill Tap models, filters and spare parts across Australia.

For customers in Western Australia, we also provide an unrivalled repairs and maintenance service
