

W2W All-In-One Filter/Boil and Chill Tap

Ideal for homes and offices, the W2W All-In-One Filter/Boil and Chill Tap provides freshly filtered chilled and boiling water from a touch-operated faucet on the sink.

This cost-effective Filter/Boil/Chill tap system removes up to 99% of unwanted chemicals and contaminants and provides unlimited filtered boiling and chilled drinking water from a smart sink-top tap.

W2W All-In-One Filter/Boil/Chill Tap with scale reduction water filter and compact under-sink water chiller unit.

Prevent limescale build-up by removing contaminants, calcium and chlorine from mains water and enjoy freshly filtered chilled and boiling water from the chrome finish sink-top tap.

- › Money-saving mains fed hot and cold water dispenser with powerful filtration and compact water chiller for great-tasting boiling and chilled drinking water on tap
 - › Improve office productivity – no waiting for the kettle
 - › Eco-friendly – no more harmful plastic water bottles
 - › We ship across Australia
 - › Available to rent in Western Australia with free standard installation, regular servicing and filter replacement included with most rental plans
 - › Can also be combined with a Reverse Osmosis filter system in areas with poor-quality source water – please contact us for details
- (1) **W2W All-in-One Boil & Chill Tap** has an electronic touchpad and provides up to 120 cups of boiling water and 125 glasses of chilled water every hour
 - (2) **W2W Maxiflow Filter System with scale reduction** removes up to 99% of dirt, contaminants, viruses, and chlorine from mains water and prevents scale buildup on the water heating system
 - (3) Compact **W2W 8L Under Sink Water Chiller** provides 50 glasses (8 litres) of chilled water an hour

Is a W2W All-In-One Filter/Boil and Chill Tap right for you?

The W2W All-In-One Filter/Boil/Chill Tap must be plumbed into the mains water supply and connected to a 10-amp general power outlet.

The W2W Maxiflow Scale Reduction Filter System removes unwanted chemicals and contaminants from incoming mains water and feeds clean, safe drinking water into the water heating system and compact under sink chiller.

You must ensure there is adequate airflow and ventilation around the water chilling and heating units to prevent overheating.

You need to have a hole drilled into your sink or bench top to accommodate the W2W All-In-One Boil and Chill Tap.

Filters should be replaced every six to 12 months depending on how much water you use and the quality of your source water.

This will guarantee the quality and taste of your drinking water and protect the internal heating and chilling components of your system.

W2W All-In-One Boil and Chill Tap

- Convenient boiling and chilled water tap for homes and offices
- Mains fed with compact under-sink water heater unit
- Up to 120 cups of boiling water per hour
- Electronic touchpad operation and programmable safety lock
- Solid brass tap with chrome finish
- Connects easily to W2W Maxiflow Filter System and W2W Under Sink Chiller
- Energy-efficient boiling water unit with automatic Sleep Mode

W2W Maxiflow Scale Reduction Filter System

- Compact under-sink single filtration system with 10" and 15" filter options for domestic and commercial use
- Easy fit, sub-micron filter removes harmful bacteria, parasitic cysts, viruses, pesticides, and herbicides, and the scale reduction filter removes copper, metals, minerals and calcium and reduces scale build-up on hot water systems
- Can be upgraded to a Reverse Osmosis filter system in areas with poor water quality
- Ideal water filtration system for cafes, coffee shops, offices and small businesses

W2W 8L Under Sink Water Chiller

- Compact, refrigerated water chiller that sits under the sink
- Delivers 8 litres (50 glasses) of chilled water an hour
- Dimensions - H29 x W21 x L41 cms
- Weight - 12.5 kgs
- Stainless steel tank and fan-assisted static condenser with non-toxic, non-flammable refrigerant (R134a)
- Quick connect 1/4" stainless steel fittings included and pressure restricting valve (PRV) and pressure limiting valve (PLV)

All specifications and measurements are approximate and subject to change.

Please ensure there is adequate ventilation and airflow around the heating and chiller units to prevent overheating.

Tailor-made water filtration systems and drinking water solutions

Providing a constant flow of safe, clean drinking water is essential to keep households, customers and employees hydrated and healthy.

Water2water has been selling, renting, servicing and repairing water filtration solutions for over 25 years and we will always recommend the most cost-effective systems to purify your water supply and meet your drinking water needs.
