

Pure Clean H2O Total Flow Water Filter System

Model TF 1000

The Total Flow Filtration System is a compact under sink system that is easy to install, connecting directly to any mixer tap or cold water tap. This allows you to enjoy your own great tasting, clear, freshly filtered water any time; with no need for a separate tap.

TF 1000

The system offers the following:

- ∇ Reduces sediment, taste, odour, chlorine, parasitic cysts
- ∇ Easy-to-change sanitary filter cartridge
- ∇ Filters available in 5 micron or 0.5 sub micron rating
- ∇ All plumbing fittings included. Customer supplies cold water tap
- ∇ System certified to Australian Standards
- ∇ System designed and assembled in Australia - Filter cartridge manufactured in USA

Enjoy great tasting clean water from your existing tap
