1 x W2W In-line Carbon Filter

## Water2water Maxiflow 10" Reverse Osmosis DIY Filter Kit

**Our cost-effective RO filter replacement kit includes a 10" Maxiflow carbon & sediment filter, plus an in-line carbon GAC filter to improve the taste of your drinking water.**

- › Premium W2W Maxiflow sediment and carbon filter removes impurities including silt, rust, sand, algae, sediment, scale particles and dirt, along with herbicides, pesticides, chlorine, and chlorine by-products
- › In-line granulated active carbon (GAC) cartridge removes any lingering odours and improves the taste of drinking water from your faucet
- › Full instructions included
- › Regular filter replacement protects the effectiveness and lifespan of the RO membrane (not included) and keeps water tasting great
- › Maxiflow and inline carbon filters last up to 6 and 12 months depending on water use and the quality of source water
- › The W2W Maxiflow RO filtration system removes up to 99% of the impurities, chemicals and contaminants found in Australia's source water
- › Low-cost servicing and preventative maintenance plans (WA only), include regular filter replacement and system sanitisation
- › Call us on **1300 880 303** to discuss your filtration needs
