Water2water 3L Chilled Water Cooler

A great value, floor standing, point of use water dispenser with a 3-litre, stainless steel cold water tank and sealed water reservoir to prevent bacteria and dirt entering the tank.

- › Adjustable cold water temperature control
- › Ideal for offices and small workplaces with up to 30 daily users
- › Larger capacity tank than most other brands
- › Stylish, robust and easy to use
- › Eliminates the need for heavy plastic water bottles, so kinder to the environment
- › Cup holder option
- › Tax deductible expense for businesses
- › Compatible with Water2water's range of under sink water filtration systems to remove chemicals and contaminants, including option to install internal filters where under sink space is limited.
- › Great for filling sustainable water bottles
- › Keep your staff and customers hydrated and healthy
- › Available to rent (WA only) and buy

Is a W2W 3L Chilled Water Cooler right for you?

W2W 3L Chilled Water Coolers need to be plumbed into the cold water supply and connected to an electricity supply.

The W2W 3L Chilled Water Cooler is a robust, easy-clean, point-of-use water dispenser that can provide chilled and ambient water for up to 30 daily users.

Water2water has a range of boiling and chilled water coolers and large-capacity drinking water fountains suitable for outdoor use and heavy traffic numbers.

We recommend combining your chilled water dispenser with a Water2water in-line filtration system to remove up to 99% of chemicals, bacteria, and other impurities from your drinking water.

Our affordable servicing and preventative maintenance plans (available to clients in WA), include regular filter replacement and system sanitisation to make sure your water cooler and filter systems are always clean, hygienic and producing healthy filtered water.
