Water2water 8L Under Sink Water Chiller

Enjoy chilled drinking water on tap with this mains-fed refrigerated water cooling system that sits under the sink and delivers 8 litres – around 50 glasses - of chilled water an hour.

- › Comes with a slimline faucet or can be connected to a three-way mixer tap
 - › Can be combined with in-line water filtration systems to remove harmful contaminants and provide great-tasting chilled drinking water at the point of use
 - › Comes with a stainless steel tank and fan-assisted static condenser with non-toxic, non-flammable refrigerant (R134a)
 - › Quick connect ¼" stainless steel fittings and pressure restricting valve (PRV) and pressure limiting valve (PLV) included
 - › 3-year manufacturer's warranty (conditions apply)
 - › Electrical supply 240v, 50Hz
 - › Saves fridge space and is more eco-friendly and less expensive than plastic bottled water
 - › Available to rent (WA only) and buy
 - › Cost-effective servicing and preventative maintenance plans available for clients in WA
- W2W's 8L Under Sink Water Chillers require adequate ventilation to prevent overheating. If installed in an enclosed cupboard, extra ventilation may be required.**

Is a W2W 8L Under Sink Water Chiller right for you?

Drinking fresh chilled water is a great way to stay healthy, hydrated and energised.

Water2water's 8L Under Sink Water Chiller needs to be connected to your mains water supply and can easily be combined with a mains-fed water filtration system.

It is a compact plumbed-in water chiller, capable of delivering around 50 glasses of chilled water every hour.

Great for filling water bottles and more environmentally friendly than plastic water bottles.

We recommend combining a water chiller with a water filtration system or Reverse Osmosis (RO) system to remove up to 99% of contaminants from your source water to guarantee clean fresh drinking water.

Water2water has been providing water filtration solutions for over 25 years. We have a large team of plumbers and water filtration technicians installing, servicing and repairing filtration systems across Western Australia and ship our products Australia-wide and overseas.
