- › Designed and built in Australia for harsh weather conditions
- › Reversible – flush dirt away easily and start filtering again quickly
- › Simple connection for DIY installation
- › Compact and highly portable

### How does W2W Caravan BEST Filter work?

The Caravan BEST Portable Filter was designed in Australia exclusively for the RV and Caravan industry.

The inline filter uses carbon and unique SilverSafe® technology to remove chemicals and contaminants from caravan and campsite water supplies to provide clean, safe drinking water for travellers.

Easy to connect to most hose fittings and standard domestic plumbing fittings.

The filter will effectively treat up to 5,000 litres of water depending on the quality of the local water supply.

The reversible filter design allows easy back flushing to remove dirt.

Water2water sells a wide range of portable water filtration solutions, and we are always happy to provide free, unbiased advice on the best filtration system for you.
