

W2W Clean Bath Shower Filter

A great value shower filter which removes chlorine, lead and harmful contaminants to leave you with softer, healthier hair and skin.

Fits easily onto most shower heads for up to 6 months of clean, refreshing showers.

Water2water Clean Bath Shower Filter

Our most cost-effective shower filter, fitted in minutes, with no plumbing, drilling or electrics needed. Removes up to 99% of chlorine, leads and odours with no impact on your shower water pressure.

- › Stop chlorine and other harmful contaminants from entering your body with this highly effective shower filter
- › Hair and skin feel softer
- › Powerful filter lasts around 6 months based on normal usage
- › Screws into most shower heads and shower arms to deliver a constant supply of filtered shower water
- › Removing excessive chlorine is kinder to sensitive skin and eczema sufferers
- › Reversible filter cartridge for balanced filtration
- › Self-sealing threads and modern chrome finish
- › Screws into your shower head in minutes with no plumbing or electricity required
- › Portable - take it with you when you travel
- › Even more effective when combined with a complete house water filtration and softening system – contact us for more information.

How does a W2W Clean Bath Shower Filter work?

Chemicals enter our body when we take a warm shower as the pores in our skin open.

The steam we inhale while showering can contain high levels of chlorine and other chemicals as they turn to vapour in heat far more quickly than water.

Water2water's Clean Bath Shower Filter removes up to 99% of chlorine, iron oxides, hydrogen, sulphide, odours, and other harmful contaminants from your shower water.

Fitting a W2W Clean Bath Shower Filter is simple.

Unscrew the shower head, screw in the filter between the shower head and the arm and you're ready to go.

W2W Clean Bath Shower Filters will last around 6 months with normal use, depending on source water quality.

If you live in an area with poor-quality source water, installing a whole house water softener and filtration system will also remove calcium and guarantee a constant supply of clean, healthy filtered water.
