

W2W High Capacity Shower Filter

Feel the difference to your skin and hair with Water2water's most powerful shower filter.

Effective for up to 900 showers, with no loss of water pressure.

Simply screw into any shower head to remove up to 99% of chlorine and unwanted chemicals and contaminants enjoy a gentler, more refreshing shower.

Water2water High Capacity Shower Filter

One of the most effective shower filters on the market, W2W High Capacity Shower Filter is ideal for people with sensitive skin and in areas with poor source water quality. You can fit it in minutes with no plumbing or electrical work needed.

- › Fits all standard shower heads and handles for a constant, high-capacity supply of filtered shower water
- › Over 900 showers from each filter - based on a 7-minute shower (depending on source water quality)
- › No plumbing, chemicals or electricity needed
- › Removes chlorine which dries and irritates delicate skin and eczema sufferers
- › Reduces harmful pollutants and chemicals absorbed through the skin and into the lungs which can cause irritation for asthma sufferers
- › EPA-standard water filtration
- › Balances pH and retains healthy minerals and electrolytes
- › Portable - take it with you when you travel
- › Polished chrome finish with solid brass filter housing to protect internal components
- › Reversible Filter Cartridge fits both ways up for balanced filtration and added durability

How does a W2W High Capacity Shower Filter work?

Chlorine, metals and dirt in tap water can enter your body through your skin and lungs when you shower.

Water2water's High Capacity Shower Water Filter removes up to 99% of chlorine, iron oxides, hydrogen sulphide, odours, and other harmful contaminants from your shower water.

The W2W High Capacity Shower Filter retains essential minerals and electrolytes and balances pH to promote good health.

Each powerful filter cartridge lasts up to 12 months or 50,000 litres of water – equivalent to over 900 x seven minute showers.

Fitting the shower filter could not be easier. Simply unscrew the shower head, screw in the filter between the shower head and the arm and you're good to go.

The solid brass filter housing with polished chrome finish looks great and fits all standard showers.

Contaminants removed

The Patented Filtration Media - Chlorgon® with KDF

Removes up to 99% of the following contaminants: -

Chlorine

Dirt & sediment

Scale

Iron Oxide

Odours

pH Vs/anode

Installation

Follow these 3 simple steps for easy installation

1ST STEP

Remove the existing showerhead from the shower arm.

2ND STEP

Remove the blue plugs from the slimline Shower Filter.

3RD STEP

Attach your new W2W High Capacity Shower Filter onto the shower head and reattach the shower head to the shower arm.

Improving water quality throughout your home

With a W2W Whole House Filtration System, you can enjoy clean, freshly filtered water from every faucet in your home, including the shower.

Alternatively, a mains fed under sink water filtration system will provide great tasting, clean drinking water from your kitchen faucet.
