## Water2water Portable Water Coolers

**Lightweight point-of-use drinking water dispensers for events and areas with limited access to plumbing. Cost-effective water chillers, available in freestanding and bench top models.**

- › Easy to use, just pop a filtered water bottle on top and plug it into the power supply
- › No plumbing required – great for events
- › High-quality refrigeration unit inside
- › Affordable chilled drinking water dispenser
- › Well-built, robust water coolers that will last for years with practically no maintenance needed
- › Also available to rent (WA only)
- › Sleek and smart water cooler unit - free standing and bench top models available
- › Great chilled drinking water dispensers for homes, small offices and workplaces
- › Non-plumbed water coolers with built-in filtration are available if you want to refill bottles from the tap – see W2W Portable Filtered Water Coolers.

## Is a Water2water Portable Water Cooler right for you?

These bottled water dispensers are ideal for areas where space for plumbing is limited, or you don't have access to a sink to fill your bottles.

You need to connect your water cooler to an electrical supply to enjoy chilled water.

It's a great value option if you want chilled drinking water on tap and the flexibility to move the water cooler to different locations.

Buy 15-litre bottles of filtered water from your chosen supplier when you need them.

If you want to refill your own water bottles from the tap and still enjoy filtered water, the W2W Portable Filtered Water Cooler comes with in-built filtration

Water2water also sells and rents (WA only) a wide range of plumbed chilled, hot and filtered water dispensers and coolers.
