

W2W Pure Bath Shower Filter

Easy fit, cost-effective shower filter removes chlorine and harmful contaminants for healthier and softer skin and hair.

Smart, chrome finish filter housing fits easily onto most shower heads and fittings.

Water2water Pure Bath Shower Filter

A cost effective way to improve the water quality of your daily shower, with no plumbing, electrics or additional filters to worry about.

- › Each filter lasts around 6 months depending on usage and the quality of the source water
- › Screws into most shower heads and handles to deliver a constant supply of filtered shower water
- › Filtered water and the removal of excessive chlorine is kinder to sensitive skin and eczema sufferers
- › Self-sealing threads with modern chrome finish
- › No chemicals, plumbing or electricity required
- › Does not affect water pressure
- › Portable - take it with you when you travel
- › The inline filter removes up to 99% of chlorine, iron oxides, hydrogen sulphide, odours and other harmful contaminants from your shower water
- › Hair and skin feel softer

How does a W2W Pure Bath Shower Filter work?

Fitting a W2W Pure Bath Shower Filter is easy.

Unscrew the shower head, screw in the filter between the shower head and the arm and that's it.

Water2water's Pure Bath Shower Water filter removes up to 99% of chlorine, iron oxides, hydrogen, sulphide, odours, and other harmful contaminants from your shower water.

Chemicals enter our body when we take a warm shower as the pores in our skin open.

The steam we inhale while showering can contain high levels of chlorine and other chemicals as they turn to vapor in heat far more quickly than water.

W2W Pure Bath Shower Filters remove harmful contaminants and retain essential minerals and electrolytes which promote good health.

Replace the filter every six months to maintain performance – especially in areas with poor source water quality.
