

## W2W Slimline Water Coolers

Water2water's mains-fed Slimline Water Coolers are great for homes and offices with up to 30 daily users.

Stay hydrated and enjoy chilled drinking water at the point of use – no waste and no heavy plastic water bottles.

Combine with a Water2water filtration system for the purest, healthiest drinking water.

### Water2water Slimline Water Coolers

Cost-effective, mains-fed refrigerated water dispensers are suitable for homes, offices, and businesses. Our well-designed Slimline Water Coolers are one of our most popular point-of-use chilled water dispensers.

- › Environmentally friendly point-of-use (POU) water dispensers – no harmful plastic bottles
- › Floor standing and Bench Top models with smart modern design and easy clean white finish
- › Ambient & Chilled water
- › Stainless steel water tank and overflow control
- › Adjustable cold water thermostat for extra chilled water
- › Available to rent (WA only) and buy
- › Cup holder available
- › Compatible with Water2water's large range of under sink water filtration systems for clean, fresh drinking water on tap.

### Is a W2W Slimline Water Cooler right for you?

Water2water's Slimline Water Coolers must be plumbed into a mains water supply and connected to a power supply.

Once connected, the refrigeration unit in the Water Cooler chills tap water before dispensing it via the user-friendly taps.

Combine your water dispenser with a Water2water filtration system to remove chemicals, bacteria, and impurities from your water supply.

We offer **FREE standard installation** (conditions apply), on many water coolers purchased or rented with a Water2water domestic filtration system (only available in Western Australia).

Water2water has a great range of filtered hot and cold water coolers and drinking water dispensers.

Contact us on **1300 880 303** for more information.

Combine with a mains-fed filtration system to remove chemicals, dirt, bacteria and contaminants from your drinking water.

### Maintenance and servicing

W2W Slimline Water Coolers are low maintenance and easy to wipe clean.

If you combine an under sink filter system to purify your drinking water, the filters will need to be replaced every 6 to 12 months to protect water quality.

Water2water's comprehensive servicing and preventative maintenance plans include regular filter replacement and system sanitisation.

Servicing and maintenance is included on many of our rental plans in most parts of WA.
