

## W2W Ultro Twin Modular Filter System

**Flexible water filtration system allows you to pair different filter combinations to purify water to feed commercial coffee machines, water coolers, ovens and steamers.**

Different sized sediment, carbon, scale reduction, pH balancing and mineralising filters can be paired to suit your business water needs and treat raw source water.

### W2W Ultro Twin Modular Water Filter System

**Ultra-effective and flexible mains fed water filtration system for catering and hospitality businesses. The robust filter head bracket accepts multiple water filter combinations.**

- › Unlimited supply of freshly filtered great-tasting water for feeding coffee machines and point of use water coolers and dispensers
- › Choice of easy fit BWT filter combinations to water needs
- › Filter options include scale reduction to protect expensive hot drink machines and catering equipment
- › pH balancing and mineralising filters with magnesium for the perfect cup of barista coffee
- › Powerful sediment and carbon filters remove harmful bacteria, viruses, pesticides, gypsum and herbicides
- › Compact system plumbs into small space under the sink leaving counter tops uncluttered
- › Rent (WA only) or buy
- › Low-cost servicing, filter replacement and maintenance plans available for clients in Western Australia

#### SPECIFICATIONS AND OPERATING CONDITIONS

##### Flow Rate Capacity

Less than 10 litres per minute  
1<sup>st</sup> Stage: 30,000 litres chlorine reduction for Fibron cartridges  
2<sup>nd</sup> Stage: Depends on chosen cartridge

##### Water Pressure Range

80 to 860 kPa (Use pressure limiting valve if pressure is more than 860 kPa)

##### Inlet Pressure Range

2 to 8 bar

##### Ambient Operating Temp.

4 to 40 degrees Celsius

**Water Temperature Range** 4 to 30 degrees Celsius

##### Inlet / Outlet Options

Standard 3/8" x 3/8" bspm

##### Dimensions

Standard Twin Head assembly bracket is 320mm wide (allow for extra fittings / hoses) and 120mm deep  
Height and weight of system will depend on the cartridges selected – allow 450mm height space

### How does the W2W Ultro Twin Modular Filter System work?

W2W Ultro Twin Modular Filter Systems need to be connected to your cold water supply under the sink.

The twin-head housing bracket accepts a combination of BWT filters to suit your source water quality and different uses.

For example, use a chlorine reduction sediment filter for the 1<sup>st</sup> filtration stage, followed by the Best Protect 2XL filter for feeding pure water to a commercial oven.

Or combine a sediment, Fibron activated carbon or scale reduction filter with a filter to add magnesium for the best-tasting coffee from your coffee machine.

The flexibility and compact size of this powerful filtration system makes it a popular choice with cafes, restaurants and catering businesses.
