

W2W BIBO Scale Reduction Boil & Chill Dispenser

Ideal for homes and offices, this bench-top water dispenser provides freshly filtered boiling and chilled water at the touch of a button.

With its sleek, modern design, digital touch screen and range of colours, the BIBO countertop unit is a great-looking and convenient addition to any kitchen or office.

W2W BIBO Scale Reduction Boil & Chill Dispenser

Reduce scale build-up and enjoy contaminant-free water with our filtered BIBO water dispenser.

- › **W2W BIBO Boil & Chill Water Dispenser** has touch screen operation and comes in a range of colours to fit any office or kitchen decor
- › **W2W Maxiflow Scale Reduction Filter System** removes up to 99% of dirt, chlorine and contaminants and helps break down calcium to reduce scale buildup on the BIBO water heating system
- › Instant filtered boiling water at the touch of a button – say goodbye to your energy-guzzling kettle
- › Provides 60 to 70 cups of hot water every hour – no waiting for the kettle to boil
- › Stay cool and hydrated with 25 to 35 glasses of chilled filtered drinking water every hour
- › Powerful filtration, easy-to-maintain, and cost-effective replacement filters
- › Available to rent in most parts of Western Australia with free standard installation, regular filter replacement and servicing included with many rental plans
- › Easy to upgrade to a 4-Stage Reverse Osmosis System rental option in areas with poor quality source water

Is a W2W BIBO Scale Reduction Boil & Chill Dispenser right for you?

The W2W BIBO hot and cold water dispenser needs to be connected to the mains water supply and plugged into an electrical point.

The W2W Maxiflow Scale Reduction Filter System with scale reduction is mains-fed and feeds contaminant-free filtered water into the BIBO dispenser which needs a 10amp general power outlet (GPO).

The scale reduction filter helps break down the minerals that cause build-up and protects the BIBO's internal heating components.

In areas with poor-quality water and high calcium content, we recommend purifying water feeding the BIBO with a W2W Reverse Osmosis water filter system.

Filters should be replaced every 6 to 12 months and annual servicing and system sanitisation will maintain performance and guarantee great-tasting water.
