

W2W Filtered Water Cooler

Unlimited chilled, filtered drinking water with this freestanding water cooler.

Suitable for households, offices and small to medium-sized businesses, with a powerful W2W Maxiflow Filter System to remove bacteria, unwanted chemicals and dirt from your drinking water.

W2W Filtered Water Cooler

The sturdy design and low maintenance make Water2water's Filtered Water Cooler one of the most reliable chilled water dispensers on the market.

- › Stay hydrated with unlimited chilled, fresh drinking water on tap
- › Large internal chilled water reservoir (12 litres)
- › Compact mains-fed 5-micron water filtration system removes up to 99% of viruses, bacteria and unwanted chemicals
- › Freestanding Ambient & Chilled POU water dispenser
- › Low maintenance and easy-to-clean
- › Eco-friendly - eliminate the need for plastic water bottles
- › User-friendly taps ideal for filling water bottles
- › Tax deductible business expense
- › Available to rent (WA only) or buy
- › Installation, servicing, regular filter replacement and maintenance available for clients in most parts of Western Australia

Is a W2W Filtered Water Cooler right for you?

The Water2water Filtered Water Cooler provides chilled, freshly-filtered water and is ideal for homes and offices with up to 30 daily users.

Robust and reliable, the W2W Filtered Cooler is a cost-effective free-standing point-of-use drinking water dispenser.

The W2W Maxiflow compact sediment and carbon filter system needs to be plumbed into the mains water supply and connected to the Water Cooler which needs an electrical supply.

Much of Australia's source water has a very high mineral content and this filtered water cooler removes up to 99% of pesticides, bacteria, chemicals, excess minerals, dirt and parasitic cysts from your mains water.

The filtration system extends the life of the cooler and guarantees unlimited pure, safe drinking water.

Our affordable servicing and maintenance plans (WA only), include scheduled filter replacement and thorough cleaning and sanitisation of your water dispenser and filter system.

W2W FILTERED WATER COOLER

W2W Maxiflow Mains Fed Water Filter System

- Compact single filter system with 10" and 15" filter options for domestic and commercial use
- Hygienic integrated filter housing and cartridge
- Easy fit, 5-micron filter removes harmful bacteria, parasitic cysts, viruses, pesticides, herbicides and other contaminants
- Easily upgraded to a Reverse Osmosis filter system in areas with poor-quality source water
- Anti-scale Maxiflow filters are available to prevent build-up on hot water dispensers
- Replace the Maxiflow filter every 6 to 12 months to protect drinking water quality

Western Australia servicing team

Water2water's head office is in Perth, and we have a professional team of plumbers and water filtration technicians living and working across Western Australia.

We offer comprehensive servicing and maintenance plans which include regular scheduled visits by one of our water filtration technicians to change the filters, clean, and sanitise the system.

Clients in WA can rent the W2W Filtered Water Cooler and installation, scheduled servicing and filter replacement are included with many rental plans in most parts of WA.

We ship across Australia and overseas.
