

## W2W Maxiflow Scale Reduction Filter System

**This high quality under-sink water filtration system is perfect for coffee shops, cafes, homes and offices.**

**Super convenient thanks to its single filter housing and quick-change filter.**

Includes 10" sediment and carbon 5-micron Maxiflow scale reduction filter, slimline faucet (design may vary) and basic plumbing fittings.

### W2W Maxiflow Scale Reduction Filter System

**Compact and discreet mains fed, under sink filtration system reduces scale build up and removes harmful bacteria, pesticides, dirt, chlorine and other contaminants from tap water.**

- › Integrated filter housing and cartridge takes up less space under the sink and comes with a slimline faucet for sink top
- › Mains fed for unlimited supply of freshly filtered, great-tasting drinking water, straight from the tap
- › No pre-flushing required
- › Powerful 5-micron sediment and carbon filter with scale reduction removes harmful bacteria, chlorine, parasitic cysts, viruses, pesticides, and herbicides
- › Helps prevent scale build-up in kettles, boiling water units and coffee machines
- › Ideal for feeding water coolers and drinking water dispensers
- › Easily combined with additional filters including Reverse Osmosis to remove calcium and suit areas with poor quality source water
- › Cost-effective DIY filter replacement kits available with easy to follow instructions
- › Available to rent (WA only) and buy
- › 15" Maxiflow filter available for commercial use – please contact us for details

### How does a W2W Maxiflow Scale Reduction Filter System work?

W2W Maxiflow Water Filter Systems need to be connected to your cold water supply under the sink, using the hoses and fittings provided.

Once connected, the high-performance, 5-micron scale reduction filter media removes unwanted chlorine, chemicals, dirt, pesticides, parasitic cysts and other contaminants from incoming water.

Clean, freshly filtered drinking water is then available 24/7 via the slimline faucet which you need to fit to your sink top.

The W2W Maxiflow single filter system is perfect where under sink space is limited and top quality filtered water is essential.

The sealed filter housing is hygienic, extremely quick to replace and eliminates the need to handle contaminated cartridges.

The W2W Maxiflow Scale Reduction Filter System is a great choice for hospitality and food preparation businesses to protect boiling water taps and coffee machines and reduce scale build-up.

## Contaminants removed by W2W Maxiflow Filter Systems

	Up to
<b>Chlorine</b>	99%

## Taking care of a W2W Maxiflow Filter System

To maintain performance and guarantee the quality of your drinking water, we recommend replacing the scale reduction filter every 6 to 12 months, depending on usage and the quality of the source water.

Water2water sells Do-It-Yourself (DIY) filter replacement kits with full instructions.

## Does the filter system come with a faucet?

Yes. Water2Water provides a slimline faucet which looks great in the home and office. With the touch of a lever, you are assured of the ultimate clear, fresh water.

## Can my water be chilled with this system?

Yes. An under-sink chiller or cooler can easily be attached to ensure cool, refreshing water is available 24/7.

## Combining the W2W Maxiflow Filter System with a Reverse Osmosis filter

Many areas of Australia have poor quality source water which contains high levels of calcium and heavy metals.

Combining a W2W Maxiflow filter with a Reverse Osmosis (RO) filter system is a great way to remove up to 99% of ALL minerals, chemicals, chlorine, calcium and metals from water.

The W2W Maxiflow filter will ensure RO filtered water tastes great and has no lingering odours from the RO process.

You can also combine the W2W Maxiflow with a range of specialist filters to address and combat specific water quality problems in your area.

## Clients in Western Australia

Water2water offers **FREE** standard installation (conditions apply) on a range of domestic water filtration systems.

We also offer comprehensive servicing and maintenance plans which include regular scheduled visits by one of our skilled water filtration technicians to change filters, clean, and sanitise the system

Installation, scheduled servicing and filter replacement is included with many rental plans in most areas of WA.
