

W2W Mixerflow Scale Reduction Filter System

A compact water filtration system that connects under the sink to your existing mixer tap for clean, freshly filtered Hot and Cold drinking water.

Mains-fed water filtration solution with powerful all-in-one sediment and carbon filter which removes up to 99% of excess calcium, chlorine, dirt and harmful contaminants.

Includes 10" 5-micron Scale Reduction filter and plumbing fittings.

W2W Mixerflow Scale Reduction Water Filter System

Space-saving plumbed in under sink filtration system reduces scale build-up and removes harmful bacteria, pesticides, dirt, chlorine and other contaminants from tap water.

Connects to your own kitchen mixer tap.

- › Powerful 5-micron sediment and carbon filter removes harmful bacteria, chlorine, parasitic cysts, viruses, pesticides, and herbicides
- › Helps break down calcium to prevent scale build-up in kettles, boiling water units and coffee machines
- › Unlimited filtered water through your existing kitchen tap - no need to drill into the countertop to add a separate faucet
- › Perfect for rental properties and where under-sink space is limited
- › Plumbing fittings and instructions included
- › Integrated single hygienic filter housing and cartridge takes up less space under the sink
- › Easily combined with water chillers, coolers and additional filters including Reverse Osmosis
- › DIY filter replacement kit available with full instructions
- › Rent (WA only) and buy
- › 15" Mixerflow scale reduction filter available for commercial use – please contact us for details

How does a W2W Mixerflow Scale Reduction Filter System work?

W2W Mixerflow Scale Reduction Filter Systems need to be plumbed into the incoming cold water supply under your sink.

Once connected, the high-performance combined sediment and carbon filter with scale reduction removes chlorine, dirt, odours, contaminants and helps reduce calcium which can cause build-up on hot water appliances.

Great for food preparation, cooking, filling reusable water bottles and keeping the whole family hydrated and healthy.

W2W Mixerflow filters last between 6 and 12 months depending on water usage and the quality of your source water.

W2W DIY replacement filter kits with full instructions are available

We offer cost-effective servicing and maintenance plans including regular filter replacement for clients in Western Australia.

Contaminants removed

	Up to
Chlorine	99%
Sediment	99%
Taste	99%

Parasitic cysts (e.g., Giardia & Cryptosporidium)	99%
VOCs	99%
Atrazine	99%
Fluoranthene	99%
Phenol	99%
Trihalomethanes	99%
Perchloroethylene	99%
Tannic Acids	99%

Taking care of your W2W Mixerflow Filter System

To maintain performance and guarantee the quality of your drinking water, we recommend replacing filters every 6 to 12 months, depending on usage and the quality of the source water.

Water2water sells Do-It-Yourself (DIY) filter replacement kits with full instructions.

Does the Mixerflow system come with a faucet?

No. The Mixerflow filter system connects to your existing mixer tap or cold water tap on your kitchen sink.

Can my water be chilled with this system?

Yes. An under-sink chiller or cooler can easily be attached to ensure cool, refreshing water is available 24/7.

Combining the W2W Mixerflow System with a Reverse Osmosis filter

Many areas of Australia have poor quality source water which contains high levels of calcium and heavy metals.

Combining a W2W Mixerflow filter with a Reverse Osmosis (RO) filter system is a great way to remove up to 99% of ALL minerals, chemicals, calcium and metals from water.

The W2W Mixerflow filter will ensure RO filtered water tastes great and has no lingering odours from the RO process.

You can also combine the W2W Mixerflow with a range of specialist filters to address and combat specific water quality problems in your area.

Clients in Western Australia

Water2water offers **FREE** standard installation (conditions apply) on a range of domestic water filtration systems.

We also offer comprehensive servicing and maintenance plans, which include regular scheduled visits by one of our skilled water filtration technicians to change filters, clean, and sanitise the system.

Installation, scheduled servicing and filter replacement are included with many rental plans in most areas of WA.
