- › Perfect for construction and mine sites, schools, universities and public parks
- › Large 28-litre water tank capacity provides 140 glasses of chilled water every hour
- › Available to rent (WA only) or buy

Is the W2W Zip 28L Drinking Water Fountain right for your workplace?

This robust, weather-resistant drinking water fountain is made for outdoor and industrial use.

The bubbler (carafe) feature is perfect for filling water bottles to help your employees, students and visitors stay hydrated.

Drinking water fountains are mains fed and need to be professionally plumbed in and connected to an electricity supply to chill the water.

We recommend combining your drinking water fountain with a Water2water filtration system to remove chemicals, bacteria, and other impurities from your source water.

This will ensure water dispensed by the fountain is always clean, fresh and healthy.
