

W2W Ultimate Whole House Water Filter and Semi-Auto Softener

Purify, soften AND filter water throughout your home or workplace with our high-performing and affordable comprehensive household filtration system.

Removes up to 99% of the calcium, chlorine, contaminants and chemicals from your water supply.

W2W Ultimate Whole House Water Filter and Semi-Auto Softener

Our mains-fed, combined water filtration and softening system provides safe clean drinking, bathing and cooking water and protects appliances from calcium build-up.

- › The combination of powerful Sediment and Carbon filters with a dedicated Water Softener provides the ultimate household water filtration system
- › Enjoy unlimited calcium and chlorine-free fresh, clean and healthy drinking water from every faucet in your home or workplace
- › Removes up to 99% of calcium, chlorine, pesticides and other contaminants in your water supply.
- › Choice of filter and water softener sizes to cater for households and business premises of all sizes
- › Professional installation service by Water2water's water filtration technicians in Western Australia
- › Enjoy softer, healthier skin and hair
- › Prevent calcium scale build-up and prolong the life of household appliances and hot water systems
- › Great point of entry mains water filtration system designed for Australia's harsh climate.
- › Affordable servicing and maintenance plans (WA only) include regular filter replacement and system sanitisation to guarantee maximum performance and water quality

About the W2W Ultimate Whole House Water Filter and Softener

Combining a Water Softener to remove calcium with mains-fed water filters that remove harmful chemicals and contaminants provides comprehensive home water filtration.

The W2W Ultimate Whole House Water Filter and Semi-Automatic Softener System combine our most effective twin Sediment and Carbon Filters alongside a hard-wearing Semi-Auto Water Softener.

The combined system plumbs into your mains water supply and filters and treats water before it enters your property.

Additional filters including Reverse Osmosis and UV systems can also be incorporated to address the quality of your local water supply.

Water2water has been installing and servicing Whole House Water Filtration Systems for domestic and commercial customers for over 25 years.

Our in-house team of qualified plumbers and water filtration technicians provide unbeatable servicing and maintenance of all water filtration systems and brands.

Contaminants removed by Whole House Twin Sediment and Carbon

| | Up to |
|-------------------|-------|
| Chlorine | 99% |
| Pesticides | 99% |
| DDT | 99% |
| Endrin | 99% |
| Lindane | 99% |
| Aldrin | 99% |
| Benzene | 99% |
| VOCs | 99% |
| Atrazine | 99% |
| Fluoranthene | 99% |
| Phenol | 99% |
| Trihalomethanes | 99% |
| Perchloroethylene | 99% |
| Tannic Acids | 99% |

Water Softeners remove up to 99% of calcium, iron and magnesium for softer water - kinder to sensitive skin and prevents scale build-up on shower screens and appliances.
