- › Prevent calcium scale build-up and prolong the life of household appliances and hot water systems
- › Great point of entry mains water filtration system designed to endure Australia's harsh climate.
- › Affordable servicing and maintenance plans (WA only) include regular filter replacement and system sanitisation to guarantee maximum performance and water quality

About the W2W Ultimate Whole House Water Filter and Softener

Combining a Water Softener to remove calcium with mains fed water filters, which remove harmful chemicals and contaminants, provides comprehensive whole-house water filtration.

The W2W Ultimate Whole House Water Filter and Softening System combines our most effective twin Sediment and Carbon Filters alongside a hard-wearing Automatic Water Softener.

The combined system is plumbed into your mains water supply and filters and treats water before it enters your property.

Additional filters including Reverse Osmosis and UV systems can also be incorporated to address the quality of your local water supply.

Water2water has been installing and servicing Whole House and Complete Home Filtration Systems for domestic and commercial customers for over 25 years.

Our in-house team of qualified plumbers and water filtration technicians provide unbeatable servicing and maintenance of all water filtration systems and brands.

Contaminants removed by Whole House Sediment and Carbon Filters

	Up to
Chlorine	99%
Pesticides	99%
DDT	99%
Endrin	99%
