- › Removing excessive chlorine is kinder to sensitive skin and eczema sufferers
- › Portable - take the shower filter system with you when you travel
- › Even more effective when combined with a complete house water filtration and softening system – contact us for more information.

### How to fit the W2W Clean Bath Shower Replacement Filter Cartridge

Fitting a replacement filter to your W2W Clean Bath Shower Filter system is simple.

Unscrew the chrome shower filter housing from the shower head. Open the housing and dispose of the old filter cartridge, before dropping in the new shower filter cartridge.

Close the filter housing and screw the filter housing back between the shower head and shower arm and you're good to go.

W2W Clean Bath Shower Filter Cartridges will last around 6 months with normal use, depending on source water quality.

The Shower Filter removes up to 99% of chlorine, iron oxides, hydrogen, sulphide, odours, and other harmful contaminants from your shower water.

If you live in an area with poor-quality source water, installing a whole house water softener and filtration system.

This will also remove calcium, alongside chlorine and contaminants, and guarantee a constant supply of clean, healthy filtered water.
